Application number: DE19981013039 19980325
Priority number(s): DE19981013039 19980325

Abstract of DE19813039

The pivot drive housing (1) has at least 2 housing sections (2,3), respectively accommodating a conversion gearing and an electric motor. A snap-fit connection (7) or permanent connection between the housing sections in alternate relative positions, are such that the electrical termination's for the electric motor face is in different directions or lie at different positions.
